40mm accessory kit

What is Microweb?

It's a **unique** filter media constructed from a **homopolymer acrylic** fibre. It has a microporous membrane applied to the collection surface. This provides a low pressure drop, causes the dust to 'cake', facilitates **better dust release** and **improves collection efficiency.**

FREE Microweb filter …99.9% filtration

Microweb is essential for dust from limestone, biochemical, lead, sugar, cement, Gyprock, precious metals, pigments and fertilizers.
