AUSTRALIAN PUMP INDUSTRIES PTY LIMITED

RELIABLE PRODUCTS...RELIABLE PEOPLE

WINTER 2008

AUSSIE GOES MINING

With an unmatched reputation for quality and performance, it's a natural progression that Australian Pump Industries would automatically move into supporting Australia's mining industry. Worldwide demands for resources have catapulted Australia into a leading position as one of the biggest producers of coal, iron ore, copper and bauxite in the World.

The mining industry demands products that are virtually "bullet-proof" and this rapidly expanding industry knows quality when it sees it!

Aussie Quik Prime self priming centrifugal trash pumps up to 4" and heavy duty diesel powered Aussie blasters have been working in the Australian mining industry for a decade. Now, Aussie is moving to "up spec" offering bigger, heavier duty machines designed specifically for tough mining and construction applications. Typical of these is the giant Aussie MQ600TD 6" trash pump. It's 6,000 litres per minute flow, fast self priming and huge solids handling capability makes it a natural for the mining industry.

Aussie heavy duty steam cleaners, like the Hammerhead, provide mines and quarries with mobile steam cleaning capability with enough grunt to get even big plant clean for both maintenance and de-contamination.

"It's interesting to see big companies like BHP Billiton, Rio Tinto, Xstrata and many other legends of the mining industry using Aussie Pump products in a wide range of applications," said Aussie Pumps Managing Director Warwick Lorenz. "Our philosophy of providing better quality outcomes in terms of performance, value for money and overall long term reliability really appeals to this tough and demanding market sector," he said.

Mining companies also love the idea of working with products that carry up to a five year warranty like the Aussie Quik Prime range. That five year warranty even applies to the big 6" model QP60TD trash pump, as well as to the range of smaller fuel transfer, water and even fire fighting pumps that make up the Aussie QP (Quik Prime) self priming centrifugal pump range.

"Measuring up to the tough demands of this exciting industry keeps the pressure on us to up our performance in all areas including after market support, application advice and prompt shipment," said Lorenz.

6" TRASH PUMP ▲

Construction companies, mines, quarries, and even water supply and sewage authorities love big trailer mounted Aussie 6" trash pumps. Available in two sizes, they offer flows to 6,000 litres per minute and heads of up to 45 metres!

These new pumps will handle solids of up to 3" (76mm) diameter and have big, integrated clean out ports for easy service.

The MQ600TD is Deutz powered while the QP60TD, it's younger brother, comes with a Mitsubishi water cooled diesel engine.

Fast self priming? You bet and the QP60TD comes with an exclusive **FIVE YEAR WARRANTY**.

▲ AUSSIE PUMP SHOP

Sydney based GYC (Garden Yard and Construction), one of Australia's most progressive small engine powered equipment companies, recently opened Aussie Pump Shops as part of their GYC chain of six Sydney branches.

The branches, all staffed by professionals, are trained in self priming pump and pressure cleaner application and engineering. All branches feature spacious, well laid out showrooms, with the Castle Hill branch offering users a virtual "Pump Supermarket" with a huge range of top quality Aussie Pump products on display!

BIG KIT COMES CLEAN ▲

Force Equipment Service and Hire at Forestfield, Perth are using big Aussie Monsoon pressure cleaners to clean mining and construction plant before and after service. The company offers a unique "QUARANTINE WASH BAY" to clean the imported equipment flooding into Western Australia.

Aussie Pump distributor Allspray, supplied heavy duty Monsoon 300 Aussie blasters with four pole motors, "Big Bertie" Bertolini triplex pumps and heavy duty steel trolleys. The units are available in a range of up to 5,000 psi and provide real cleaning whack!

▲ FIELD DAY SEASON COMING SOON

Aussie Pump Gold Distributors will be exhibiting the full range of products at this season's mid-Winter and Spring field days. The Aussie Pump dealer support team are ready to hit the road, presenting this years' great new products.

"We think farmers are sick of cheap quality Chinese products that just won't go the distance," said Aussie Pump's Brad Farrugia. "They like top quality Aussie gear that is built to ISO9001 standards."

STEAM IS CLEAN AND GREEN

Tamworth based contractor, Dennis Cronberger uses a big Aussie Hydrotek 4,000 psi Honda powered steam cleaner! "We started out cleaning driveways and car parks where removing oil stains was the big challenge," said Dennis. "The 4,000 psi Hydrotek produces 130°C steam and gets the job done faster, with less water, less time and huge savings in chemicals and detergents."

The Hydrotek steamer is ideal for plant wash down as well with the ability to clean contractor plant in the field. Diesel versions are also available.

JETMAX... WATER ON TAP

Rain water is too valuable a commodity to waste, say the Robertsons of Swansea Heads in NSW. Using a big Aussie Jetmax M600 pump teamed with a large water storage tank means real independence from town water supply problems and an efficiency that doesn't create a huge power bill or a negative environmental impact!

"We could run 10 or 12 taps at once and still have loads of water pressure," says Kim Robertson. The big Jetmax pump is ideal for stations, motels, farms, large houses or any constant water supply chore requiring flows of up to 120 litres per minute. Lots of pressure?... You bet!

STAINLESS STEEL PUMP

New Aussie GMP model B3XRA-X is built from cast 316 grade stainless steel! That makes it suitable for both corrosive and abrasive applications.

Powered by a heavy duty Yanmar L100 electric start industrial diesel engine, this 3" pump offers flows to 1270 litres per minute, heads as high as 40 metres and has the ability to pump 9mm solids in suspension! Add a galvanised steel frame and anti vibration mounts and you've got a machine that is ideal for mines, quarries, contractors or local government applications.

You can even get hydraulic drive!

HONDA DIESEL TRASH PUMP

A new Aussie Quik Prime 4" trash pump uses a 9.5HP Honda air cooled industrial diesel engine as it's prime power source. The big Honda diesel engine delivers loads of power and features electric start.

The 4" pump is ideal for councils or contractors who are showing a growing preference for going diesel to cut fuel costs and extend engine life.

Huge flows and the ability to pump solids in suspension make the QP40TD a real asset in de-watering applications.

HAIL TO THE CHIEF

The Aussie Fire Chief continues to win accolades for it's performance, top quality components and stunning five year warranty! Col Rowland, of Col's Ag Buying Services, sells the Fire Chief with total confidence knowing that it out performs and out features all others.

"By crikey, these pumps have got the lot," said Col and with 2008 looking like bad fire season, Aussie had better crank up production to meet demand!" he said.

COBRA IS KING

Aussie King Cobra is Australia's number one heavy duty 5,000 psi drain cleaning jetter! Using a "Big Berty" HD series Bertolini pump the machine produces 20 litres per minute flow and is powered by a 24 Honda industrial engine! This safe, super efficient drain cleaner gets drain cleaning jobs done fast, including chopping it's way through tree roots with the Aussie Root Mulcher!

Want a bonus? The King Cobra doubles as a super efficient water blaster!

NAVY COVERS

Aussie Envelop covers are now being used by the Royal Australian Navy to cut corrosion and operating costs. The covers are already saving the US Navy millions of dollars per year in annual maintenance.

The fitted covers are made from a unique material that prevents the condensation that results in the 'greenhouse' effects of humidity and temperature fluctuations under normal covers.

The new covers are fabricated into a custom fit and then placed over the equipment. They will absorb surface moisture and condensation, keeping metal surfaces dry and corrosion free.

HIRE VAC A WINNER

Big Aussie VS72 industrial wet dry vac is a real winner with Australia's biggest and best hire companies. With the 75 litre, impact resistant poly barrel, two powerful 1200 watt motors and a super strong steel trolley, the VS72 is designed for a life of grime!

Add the exclusive Aussie Microweb filter element, providing 99.9% filtration and you've got a vacuum cleaner that will handle cement dust, gyprock dust, herbicides, fertilizers and other fine granular powders.

Go with the best in the business! Clean up with a big Aussie vac now.

FUEL UP AND GO

Farmers and contractors can turn any ute or trailer into a portable diesel fuel station simply by installing a diesel compatible tank and Aussie Rotor 12 volt DC diesel transfer pump. These super efficient, low cost pumps will pump up to 40 litres per minute and make fuelling combines, broadacre tractors, pumps, generators and earthmoving plant a breeze.

The Rotor kit includes 4 metres of diesel fuel compatible hose, a nozzle gun, and heavy duty electrical cable with alligator clips. An on/off switch is installed on the pump for operator convenience.

HONDA SHOP COMES CLEAN

West Australia's Honda Shop is famous for being the biggest Honda dealer in Australia. It's also a major Aussie Pump Shop outlet offering a complete range of Aussie pumps and pressure cleaners.

The Honda Shop offers a supermarket of pressure cleaner equipment from Honda powered 3,000 psi machines built tough for farm wash down, all the way through to huge diesel powered heavy duty 5,000 and 7,000 psi machines designed for mines, shipyards and construction sites. Hose reels, drain cleaners and steamers, all backed by expert advice and prompt service complete the package.

KUBOTA PUMPS UP PRODUCTION

Teaming Kubota diesel engines with top quality Aussie self priming pumps and pressure cleaners seems like a natural move. Typical is the big 4" Aussie gusher, delivering a whopping 1,800 litres per minute maximum flow. This pump is a super sucker with a suction lift of 8.4 metres. Wow ... that will fill tankers fast!

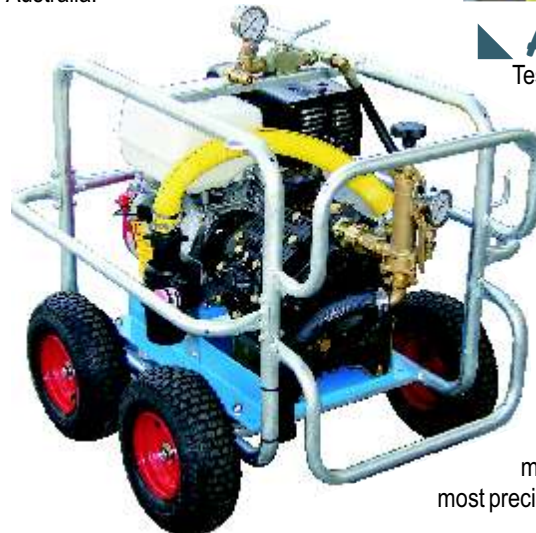

Kubota diesel engines offer users reliability and fuel economy and are backed by Kubota's diesel engine service network across Australia.

AUSSIE HYDROTESTER

Testing water or gas pipelines is vital for ensuring leaks are detected and losses minimised. The Aussie Kappa 125 HTP (hydrotest pump) provides flows of up to 125 litres per minute and is capable of heads as high as 40 BAR! The core of the system is a big Aussie Udor Kappa 125 high pressure four cylinder diaphragm pump driven through a 6:1 reduction gearbox by a Honda industrial petrol engine.

Isolating and repairing leaks fast can save millions of litres of water, one of the planets most precious commodities.

JUST ADD WATER

Councils, contractors, government service providers, miners and earthmoving operators all dream about a high pressure steam cleaner that is mobile, rugged, and sells for a reasonable price! Here's an Aussie Hydrotek trailer mounted engine drive steam cleaner that develops 3,000 psi pressure, 21 litres per minute flow (that's whack), is powered by a big twin cylinder petrol engine with electric start and includes stainless steel hose reels, a heavy duty poly 800 litre water tank and a 28" Aussie Hydro-twister flat surface cleaner.

That's the JAW package! Trailer comes complete with lights and brakes, ready for registration.

Need anything else? JUST ADD WATER!

STELLA STEAMS CLEAN

New Aussie Stella is a real "new deal" in heavy duty steam cleaning for transport and earthmoving contractors. The Stella features a robust steel chassis, heavy duty triplex pump and steel side panels.

It's a 130°C steam cleaner with models available from 1,500 psi all the way through to 4,000 psi.

Best of all for operators, the Stella is super simple to operate and service. No fancy electronics, no PCBs, just a simple, high pressure steam cleaner that looks like no other! Got a tough job? Tired of expensive repairs? ... Put Stella on the job.

AUSSIE AB SERIES MK 2

Farmers and tradesmen love the AB Mk 2 Series range of pressure cleaners. These no compromise, powerful engine drive blasters will handle any cleaning task from tractor wash down to general property maintenance jobs like moss removal or driveway cleaning.

The range includes 2,000, 3,000 and the big 4,000 psi AB42! "Big Bert" pumps are standard and genuine Honda engines provide loads of power.

All of that on a seriously robust steel chassis with big pneumatic tractor tyres and chrome handle bars! These new Aussies have got what it takes!

Loads of accessories to make your cleaning chores easier ... just ask your Aussie Pump Shop.

WAR ON WEEDS

Aussie Spraymaster engine powered sprayer packs are becoming more popular with farmers everyday. With a product range that extends from 20 litres per minute to 150 litres per minute flows and with pressures as high as 50 BAR, these flexible engine drive kits can be used for a myriad of on farm applications.

Weed elimination, machine wash down, high pressure water transfer and even fire fighting are just some of the tasks that can be accomplished with these great little spray rigs. Aussie also provides complete kits that include tanks, hose reels and spray guns that are designed for either wash down or ag spray applications.

EASTERN EXPORT ACTION

Big contracts continue to come out of the Middle East for top quality Aussie products like this 4" trolley mounted gusher. Our Middle Eastern distributors love the big pump's ability to draught water from wells, and it's heavy duty sg cast iron impeller and volute combination to handle small solids in suspension.

Yanmar diesel engines are also popular with our Middle East buyers because of their easy service and worldwide parts availability .
